

EF DELTA

The Ultimate Battery Generator

The Problems of **Gasoline Generators**

“Stale fuel is the No.1 cause of generator starting problems
Manufacturers advise adding fuel stabilizer to the gas to minimize
fuel breakdown, varnish and gum buildup.”

————— Family-Handyman

“Carbon monoxide poisoning sends more than 20,000 people to
the emergency room each year.”

————— Institute of Standards and Technology

Why You Need A Battery Powered Generator

Lightweight & Compact

Compared to gasoline generators, battery generators are more compact and lightweight.

Safely Use indoors

Gasoline generators are loud and emit carbon monoxide. But you can safely use DELTA indoors during power outages or home recreational activities.

Save Time & Money

Maintaining a gasoline generator is expensive and time consuming - typically maintained semi-annually at a cost of \$150 per year. Battery-powered generators require no maintenance.

The New Standard of Battery-Powered Generator

No Gas / No Noise / No Emissions

Recharge from 0
to 80% in 60 min

2 Years Battery
Warranty

Up to Six 1800W
AC Wall Outlets

Universal Solar
Input

Rigid Structural
Design

Protective Safety
Measures

1 Hour 0 to 80%

The Fastest Recharge Rate

For the past two years we've dedicated our time and energy into creating the X-Stream Recharge Technology. This technology provides the fastest recharge rate on the market, working 10x times faster than competing brands of battery-powered generators. This allows DELTA to be fully recharged in under two hours using any regular wall outlet.

400W

Max Solar Input

In perfect sunlight and 400W of solar panels, DELTA can be fully recharged in just four hours.

130W

Max Car Charge Input

DELTA can be fully recharged in just 10 hours.

1800W AC Output

DELTA can charge anything in your household, ranging from your lights to your power tools in your workshop. It can even charge your electric vehicle in case of emergency! With its 1800-watt output, the power station can add 3 to 5 miles of range to an electric vehicle.

Meets The Standard Of Any Wall Outlet

13 Devices

Powered Simultaneously

DELTA is built to give you peace of mind. Bring DELTA to any party or into your living room and power up to 13 devices simultaneously. DELTA's system includes four regular USB ports, two 60-watt USB-C ports plus four wall outlets on the International edition and six wall outlets on the American edition. DELTA meets the standard of any wall outlet so you'll always feel right at home.

1260Wh Capacity

With DELTA, you're prepared for any emergency. It's safe, easy to use, and gasoline-free. Run fridges, lights, medical devices, and other essentials, all with the flip of a switch.

A power outage doesn't have to cause distress for families who rely on medical devices, such as a CPAP machine or a medical fridge. With DELTA, you're always well prepared for the unexpected.

Compatible With Any Solar Installation

Universal Solar Input

Harness the power of the sun by recharging DELTA with solar. Power everything you need to live life off the grid or back up your home in an emergency with a portable solar panel.

DELTA is compatible with any solar panels on the market. In perfect sunlight and 400W of solar panels, DELTA can be fully recharged in just four hours. DELTA is even able to be hooked up to an already existing solar roof installation.

Aerospace-grade Aluminum and High-strength Steel

Rugged As Any Tool In The Shed

Rigid structure

DELTA was strategically designed to have a low, solid center of gravity, mitigating rollover risk. In addition, it is made with aerospace-grade aluminum and high-strength steel to achieve maximum strength and durability.

EcoFlow's Patented X-STREAM Charge Technology

The Power Management System converts DC to AC, and AC to DC in the most efficient way, allowing you to charge DELTA fully in just two hours. It has protective measures in place, which extends the power surge up to 3300W and prevents overload.

EcoFlow's Battery Management System

Inside DELTA, there are 140 lithium-ion battery cells. To extend the performance, life-cycle and shelf-life of DELTA, we've developed our own proprietary Battery Management System. The Battery Management System regulates all the lithium-ion batteries inside DELTA and takes care of the batteries health individually using AI algorithms.

Uninterruptible Power Supply (UPS)

In case of an outage, the UPS feature comes in handy. When DELTA detects a power failure, it automatically kicks into gear, which allows a computer or any of your most sensitive utilities that you can't afford to lose to keep running.

Chainable for Capacity

DELTA can be chained to expand capacity. In order to expand DELTA capacity, all the DELTA should be full battery.

Air Conditioner 5000 BTU

Our Story

Eli Harris - CEO

Before starting EcoFlow he was building out the Enterprise Department at DJI, focusing primarily on public safety. He admires Bill Gates's integration of technology and philanthropic thinking.

Frank Zheng - COO

Previously founded 3 successful chemical and material engineering companies before EcoFlow. His nickname is "Octopus" because of his ability to keep track of so many projects simultaneously.

Bruce Wang - CTO

Previously the Head of Battery R&D at DJI. He grew the team from 1 to 400 employees. He makes the impossible, possible.

Hannah Sieber - CMO

Previously Investment Manager at San Francisco's Economic Development Center. She can talk for hours about battery generators. If you don't believe us, then check out her cameo on HSN!
